

TREATMENT OF FEMALE FERTILITY CONDITIONS THROUGH MODULATION OF THE AUTONOMIC NERVOUS SYSTEM

ABSTRACT OF THE DISCLOSURE

[00163] Methods are provided for treating a subject for a fertility condition. In accordance with the subject methods, at least a portion of a subject's autonomic nervous system is modulated to increase the sympathetic activity/parasympathetic activity ratio in a manner that is effective to treat the subject for the condition. Embodiments of the subject invention include modulating a subject's autonomic nervous system using electrical energy and/or one or more pharmacological agents. The subject methods find use in the treatment of a variety of different fertility conditions. Also provided are kits for use in practicing the subject methods.
